

Why Tungsten Automation and Genus Technologies

How Genus ActiveInbox Compliments Tungsten Automation

About Genus ActiveInbox by Genus Technologies

Transitioning from client-server architecture to the cloud can be challenging, time-consuming, and disruptive, but it's necessary as legacy technologies become unmanageable. Tungsten Automation's TotalAgility offers a modern solution for migrating Capture workloads, though replicating business processes can require significant time and resources. Genus ActiveInbox simplifies this transition by mirroring Capture configurations and providing migration tools that reduce cost and time while retaining the full power of TotalAgility to enhance business value.

App Features

Genus ActiveInbox offers simple administrative configuration for document ingestion processes, migrates existing batch classes and document automation setups, and provides enhanced reporting for staff and processes. It tracks page volume for each ingestion process and supports exporting standard data formats to various storage environments.

Brand Overview

How Genus Technologies partners with Tungsten Automation

Genus Technologies is a highly collaborative systems integrator and solution provider with over 25 years of expertise in solving complex digital transformation challenges.

Genus Technologies partners with Tungsten Automation to enhance customer success through its Consulting, Professional Services, and Framework Accelerators, which streamline implementation and increase efficiency.

As a Titanium Partner with over 25 years of expertise, Genus provides vendor-neutral analysis, design, and implementation services across Intelligent Automation, Document Processing, Workflow, and Case Management, helping organizations streamline business processes.

How Genus Helps Customers

Common Customer Challenges and Solutions

Genus helps customers by streamlining document-centric and content-intensive business processes, addressing challenges like manual processes, inefficient workflows, and poor data quality. We implement advanced AI-enabled tools to improve productivity, reduce errors, and enhance compliance.

Industries and Use Cases

Genus serves industries and use cases such as Financial Services, Banking, Insurance, Healthcare, Accounts Payable, Manufacturing, Government, and Logistics, providing tailored solutions to meet industry-specific challenges

Our Customers

Our ideal customers are mid-to-large enterprises seeking to modernize their document workflows, enhance efficiency, and leverage intelligent automation to drive digital transformation.

Buzz words to listen for...

- CLOUD MIGRATION
- AI-DRIVEN AUTOMATION
- OPERATIONAL PRODUCTIVITY
- DOCUMENT AUTOMATION
- BUSINESS MODERNIZATION
- COST CONTROL

How We Transact

Genus works with customers through flexible licensing and subscription models, offering customized solutions based on project needs. We engage directly with businesses or through trusted partners, providing ongoing support and consulting to ensure smooth implementation and optimal performance of our solutions.
